

WebR index

This WebR website is created using Quarto. It is a collection of R snippets useful for my study of R.

The website, started in June 2024, is designed to maximize quick access to frequently asked materials. It is not a tutorial, more like a quick reference. R commands are usually indicated in the initial callouts.

The main sections in this website are:

R-Basics

1. data-types
 - basic-types
 - strings
 - factors
 - dates
2. dataframes
 - df-textentry
 - df-import-export-csv
 - df-select-filter-arrange
3. ggplots
 - ggplot-basics
 - ggplot-regression
 - ggplot-functions

DataSets

1. Rdatasets
 - iris
 - penguins
2. Cancer

R-Statistics

1. inferences
2. regression
3. machine learning

R-References
